

Our Family's Peach Farm: Math 3rd Grade Math Worksheet

Name: _____

You are now a Peach Farmer! Answer the following questions to use math like a farmer.

1. Your peach farm is 5 acres and it needs water badly! If you use 10 gallons of water for 1 acre, how many gallons of water will you need for all 5 acres?
2. One wagon can hold 120 buckets. How many buckets can four wagons hold?
3. One peach tree can produce 400 peaches! If you harvest three trees, how many peaches would you have?

If 225 peaches are destroyed due to pests, how many peaches are remaining?

4. If it takes 4 hours for a peach farmer to fill 24 wagons with peaches, how many wagons can a peach farmer fill in 12 hours?
5. A peach cobbler takes 4 medium peaches. If a farmer sells 14 baskets (each basket has 6 medium peaches), how many peach cobblers can be made?
